

## Notice – NUbiocell® Tonic Plus

### COMPOSITION :

*Chlorella pyrenoidosa*, water, humectant: glycerol, *eleutherococcus senticosus* (*Eleutherococcus senticosus*), acidifying agent: citric acid, aroma, preservatives: sodium benzoate and potassium sorbate, colouring: caramel E150C.

Ingrédients	A dose of 20 ml	% of Nutritional reference value
<i>Chlorella pyrenoidosa</i>	10 g	-
Dry extract of <i>eleutherococcus</i> (Siberian Ginseng)	1 g	

### INDICATIONS :

A daily dose of 20 ml of NUbiocell® Tonic Plus allows you to stay healthy thanks to its original composition. NUbiocell® Tonic Plus is recommended for intensive exercise (sports or intellectual exercises). It is ideal for exam periods to increase concentration. Indeed, the composition of NUbiocell® Tonic Plus is quite natural because it contains liquid *Chlorella pyrenoidosa* of medium green to dark green color and a dry extract of *Eleutherococcus senticosus* (*Eleutherococcus senticosus*) just as natural. The chlorophyll contained in *Chlorella* promotes the transport of oxygen to organs requiring intensive intake.

### PRESENTATION :

NUbiocell® Tonic Plus is available in vial of 200ml Net weight : 225 g

### HOW TO USE IT AND IN WHAT QUANTITY :

- **In cure**, drink 20 ml per day pure or diluted into fruit juice ideally in the morning. It is generally recommended to continue the treatment for 4 - 6 weeks.
- **In active support**, 20 ml twice a day, preferably in the morning.

### PRECAUTIONS & CONSERVATION :

Excessive consumption can have laxative effects. Store in its original, tightly closed packaging. Keep out of reach of children. Consult your doctor or pharmacist if you are using anticoagulants at the same time.

Store away from light and moisture, at room temperature between 15 and 25°C.

**VALIDITY :** See outer packaging

## Learn more about certain components of NUbicell® Tonic Plus

*Chlorella pyrenoidosa*, the main active component of NUbicell® Tonic Plus, is a unicellular microalgae that reproduces in freshwater by cell division through photosynthesis. It consists of 62 to 65% protein, 15 to 20% carbohydrates and 11 to 13% fat (including 82% unsaturated fatty acids). It contains no less than 18 amino acids (including the 8 essential amino acids) whose chemistry is close to that of animal proteins. *Chlorella pyrenoidosa* contains the highest known level of chlorophyll in botany. It is also very rich in beta-carotene. It also contains vitamins B (B1, B2, B6, B12), niacin, pantothenic acid, folic acid, biotin, paba and inositol as well as many minerals, including phosphorus, calcium, magnesium, sulfur, iron, manganese, copper and zinc. Among the minerals, it is necessary to highlight the extraordinary richness in Zinc (323 mg/100 g) of *Chlorella pyrenoidosa* used in NUbicell® Tonic Plus. It comes from an exclusive culture produced under strict hygiene and quality standards.

Eleutherococcus (Siberian ginseng) improves physical energy and supports the immune system. This plant also contributes to optimal mental activity. Eleutherococcus (Siberian ginseng) is one of the best plants to use in case of general fatigue (physical, psychic), stress or immune fragility.
